I have been developing software for over three years, working primarily in the frontend field. In addition, I have developed my own projects as a full stack developer.

## EDUCATION

### ATATURK UNIVERSITY

Computer Programming Associate Degree - Graduated 2023

## EXPERIENCE

### Frontend Developer , August 2024 - January 2026 - SkyAtlas

- The citizen logs in , creates an application, adds their address information and title deed details and submit it. The application is reviewed by staff , and the necessary procedures are carried out. I use Vue js 2 , bootstrap-vue and vuex create kultur ministry project.
- My second project I create custom component with mock data (backend wasn't ready) I use Nuxt js and tailwindcss.

### Frontend Developer , January 2024 - August 2024 - Polinity Group

- This project belongs IBB and we made CRUD process. I create custom component with JS/TS and use it. MVC project I use Javascript , TypeScript, Devexpress , Jira and Metronic template.

### Frontend Developer May 2022 - August 2023 - Rise Technology

- Project name Otokoc 2. el create custom component with mock data . I use Nextjs , typescript, tailwindcss, storybook , Figma , Atomic Design and I was write unit test with React Testing Library.
- My second project ARPIES this is a hotel reservation website you can select room and add your own information. I use React js , Typescript and Devexpress.
