Associate Degree in Computer Programming — Atatürk University, Graduated 2023

Software developer with 3+ years of experience, building web apps end-to-end — frontend, backend, and API integrations. I've independently shipped multiple products from concept to production, with a focus on AI/LLM-powered apps, using Claude Code to move faster across the stack.

PROFESSIONAL EXPERIENCE

Frontend Developer — SkyAtlas *Aug 2024 – Jan 2026*

- Developed and maintained enterprise-grade Vue.js applications for a live government platform serving public users.
- Architected the initial Nuxt.js frontend on mock APIs, unblocking frontend delivery months before backend services were ready.
- Built a reusable component system with Vue 2, Vuex, and BootstrapVue, reducing duplicated UI code across modules.
- Integrated RESTful services and worked with backend engineers and designers (Figma) to ship production features.

Frontend Developer — Polinity Group *Jan 2024 – Aug 2024*

- Built reusable, typed components in JavaScript/TypeScript within an MVC architecture using DevExpress and Metronic.
- Developed and maintained CRUD modules powering structured data workflows for internal business tools.

Frontend Developer — Rise Technology *May 2022 – Aug 2023*

- Built responsive web apps with Next.js and TypeScript, backed by unit tests for core flows.
- Implemented an Atomic Design architecture and Storybook component library to standardize UI development.
- Shipped a hotel reservation app (room browsing, availability, booking) integrated with real-time REST APIs.

PROJECTS

podenglish.xyz — Generates podcast audio with synchronized transcripts and translations; learners pick both target and interface language.
Tech: Next.js · TypeScript · Express · PostgreSQL · Redis · BullMQ · GPT-4o-mini + TTS · React Query · Tailwind · Docker · JWT · GitHub Actions

storyenglish.com.tr — Visual English practice: users describe random images, then AI corrects their writing and shows an improved version.
Tech: Next.js · TypeScript · Express · PostgreSQL · Redis · GPT-4o-mini · React Query · Tailwind · Docker · JWT · Nginx

ilankit.xyz — Turns a single property listing into a multilingual marketing package: listing copy, social captions, and a shareable mobile landing page for independent agents.
Tech: Next.js · TypeScript · PostgreSQL · Supabase · Claude (Sonnet) API · React Query · Tailwind · Vercel · i18n

talkbridge.com.tr *(hackathon)* — Near-real-time video calling that removes language barriers — translates speech and delivers it in a similar voice.
Tech: Next.js · TypeScript · Express · WebRTC · WebSocket · GPT API · Fal AI · Claude Code · Tailwind · Docker · CI/CD

auditiq *(hackathon · source available)* — Multi-agent AI auditor for SMBs — five Gemini agents run in parallel to cross-check contracts, invoices, and privacy policies, flagging vendor overcharges and compliance gaps (GDPR/KVKK/CCPA) and drafting objection letters.
Tech: Next.js · FastAPI · Python · Google ADK · Gemini API · Google Cloud Run · Firestore · SSE

insight-ai *(hackathon · source available)* — Socratic AI coach that asks questions instead of giving answers; tracks weak points and generates active-recall quizzes.
Tech: Next.js · TypeScript · Express · Supabase · Gemini API · Claude Code · Google Cloud Run · Tailwind · JWT

TECHNICAL SKILLS

Frontend → Next.js, React, Vue.js, Nuxt.js, TypeScript, Zustand, React Query, Tailwind
Backend & Database → Node.js, Express, FastAPI, REST APIs, BullMQ · PostgreSQL, MongoDB, Redis
DevOps & Cloud → Docker, CI/CD, GitHub Actions, VPS, Google Cloud Run, Vercel
AI → GPT, Claude Code, Gemini, Ollama
Tools & Languages → Git, GitHub · JavaScript, Python
